Latest Cmdr64.dllUS Senate reneges
on 'radical' Syrian leader The US
Senate has voted to block a proposal
to blacklist Syrian President Bashar
al-Assad's government for human
rights abuses, opting instead for a
symbolic measure that cannot
impact on the Assad regime's ability
to do business with the United
States. Under the amendment
offered by Republican Senator John
Cornyn, the Senate passed an
executive order stating that "the
Government of Syria is responsible

for the deprivation of life in circumstances involving an act of torture or cruel, inhuman, or degrading treatment or punishment." The amendment in no way blacklists Syria from doing business in the United States. "The amendment is a distraction because it does not have the force of law," said Nicole Munoz, US deputy assistant secretary of the state for the Bureau of Democracy, Human Rights and Labor. She was responding to questions about the legislation's impact on Syria.

Q: Question on proving the fact that the solution to a differential equation is concave down? I'm trying to prove that, for each time t , the solution to the differential equation $f'(t) =$

$f(t) - f(t)^2$ is concave down. I started with the basic differential equation $y' = xy$, which is equivalent to $y = xy$ (see to this question 6d1f23a050)
