starting with hoi4 1.8, paradox updated its official launcher, and unfortunately that caused a lot of issues for mod users. if youre having trouble loading the mod, being told descriptor file missing or that kr is out of date, chances are you need to troubleshoot your launcher. kaiserreich is a complete re-imagining of the central powers scenario. it presents the story of a player-driven historical timeline. a timeline that is influenced by the player choices as well as by the decisions of the ai. decisions made during the early 20th century will shape the evolution of the weimar republic and the united states of america to the point where world war ii is inevitable. with that in mind, the kaiserreich team does not set a specific date for the start of the war. it can happen at any time, and the story will unfold as it normally would. however, the timeline and the wars will be influenced by the player's decisions and actions. in order to facilitate the huge scope of this project, the kaiserreich team has divided the mod into sections, each with a predetermined task or set of tasks to complete. for a full description of what is included in each section and what is expected of players in order to pass each task, please consult the following pages: a large part of kaiserreich is about the historical events of the period, which can be affected by the choices made by the player. the following is a general overview of the events that take place in the kaiserreich timeline, and the effects they will have on the game: whether you are a fan of the kaiserreich lore or just want to see some alternative history of wwi, this mod is a great place to start. even if youve been enjoying the kaiserreich mod for some time, you should still pick this one up to see the latest updates and bug fixes. 5ec8ef588b
