Smart Router (x86/x64) - Utilities... Smart Router is a device driver for routers that connects a PC to the Internet and acts like a gateway to the local network. Smart Router turns any networked PC into an access point. It captures all incoming and outgoing traffic to and from the LAN. Users can access the internet through their LAN with full network speed and can access their local network using the internet's default gateway. Smart Router also has firewall, URL-filter, anti-spam, SIP proxy, anti-malware, data-encryption features. It is small, easy to use and can run on all Windows computers. As such, it is a perfect choice for use in companies or in small businesses. Smart Router has two versions: a free one and a full one. The free version does not include firewall, URL-filter, anti-spam and anti-malware functions. The full version has all the features of the free version as well as the following additional features: Can be configured to start automatically at Windows bootup time. Can turn on the firewall and URL-filter in the background when needed. Can be configured to start the anti-malware application in the background when needed.... 2. Radioactive Surround 2 (x86/x64) - Multimedia & Design/Rippers & Converters... Radioactive Surround 2 is a multiplatform tool for surround and stereo music decoders and audio converter. It allows you to enjoy your favorite music in all formats, at the highest quality, in any setup. Unlike other surround decoders, Radioactive Surround 2 will never play back multi-channel music in stereo mode, because it's a monaural decoder. It also won't play back stereo music encoded in surround formats, because it's a stereo encoder. Radioactive Surround 2 will only decode and encode stereo music in surround formats like DTS, Dolby Digital and TrueHD.... 3. Mathematica x86 - Educational/Mathematics...
